

Sunfab SC is a series of piston pumps with a fixed displacement for exacting mobile hydraulics.

Sunfab SC covers the entire displacement range 12–108 cm³/revs at a maximum working pressure of 40 MPa.

Sunfab SC is a modern, compact pump which meets the market's high demands on flow performance, pressure, efficiency and small installation dimensions.

Sunfab SC is either mounted directly on the power take-off or on a frame bracket via an intermediate shaft.

The SC pump should be supplemented with the Sunfab BY-PASS valve in installations where the hydraulics are used while the vehicle is on the move.

Sunfab SC's reliability is based on the special hardening and surface finish of special components and on the strict quality checks throughout the entire manufacturing process.

Other advantages of Sunfab SC:

- High maximum speed while maintaining low noise levels.
- Smooth operation over the entire speed range.
- Long life due to high demands on material selection, such as bearings, seals, etc.
- O-rings on all contact surfaces as well as double shaft seals eliminate oil leakage from the pump and power take-off.
- The stop shoulder on the angle housing allows the pump's direction of rotation to be changed without the risk of altering the gear meshing.

Type SC		012	017	025	034	047	064	084	108	
Nominal oil flow at pump speed rpm					l/min					
	500	5.8	7.9	12.5	17.0	23.5	31.5	41.5	54.0
